

HANDS ON SCIENCE

2019 School Holiday Incursion Program

Book us to visit your Holiday Program. We can entertain and educate the children with science activities designed to a theme. Sessions are conducted by science teaching specialists in a fun and meaningful way.

Special Themes	Topics
Easter Holidays	Eggsperimenting The chocolate egg challenge Egg chemistry and technology Make a wobbly egg toy to take home
July Holidays	On the Move Design and make the funniest flying machines which spin, summersault or twist and turn Use air power to make objects move over land. Take models home to share with family
Sept/Oct Holidays	Halloween Science Make green slime Enjoy many "trick and treat" experiments Find out about the history
Dec/Jan Holidays	Water Action Look at different ways to make rockets move. Make a fountain, sink a poly bear, study what happens to a balloon and enjoy some other unusual water experiments.

Available All School Holiday Periods

Harry Potter's Science

Hands On Science brings to life the drama of Harry Potter's wizard school. Use your special wand to make things move, change colour and even disappear. Make a jumping Cornish Pixie to take home.

Weird Science

Crazy chemistry experiments. Make things grow and move in interesting ways. Make a weird wriggly toy to take home.

INFORMATION:

Outer regions incur time and travel costs.

Multiple sites per day may incur a surcharge.
